Languages

- Hungarian (Native)
- Confident English (C1 language exam)

Work Experience

Porsche Hungaria Kft.
Web developer trainee
2019.03.18 -

In this position I acquired hands-on experiences in the field of Web Development. I participated in several projects with my team, and I had a chance to act as a project manager as well. I used mostly Content Management Systems to maintain complex websites, but I was not afraid to use my HTML, CSS, and JavaScript skills when it was needed to create or redesign a webpage.
